Racing in terms of human sport endeavors is an extreme sport, a daredevil sport. This was much to my disillusion when I raced Crimson 'N Gold. It has been 20 years since opening my therapy business for horses, pioneering the field of equine massage. I needed certainty about what differences were made with specific applications in my treatments. I needed my own advanced athlete to figure it out. A result of my discoveries 10 years on, is how long it’s taken me to refine a program of positive change for racing horses. A sport that is the microcosm of the Universe - where quantum effects show up right away. Which is to say the myriad, multiple influences coming to a point on one horse, one race, many times over, multiplied.

The test barn is where first and second place runners go to recover and get checked for drugs after the race. A place where only grooms and medical attendants are present because no trainer, no owner, no one really wants to see what it took for the horse to achieve what it did. The toll on its body is epic. It is visible and palpable. Which is why it is recognizable to a horse if you have both been there.

Of course, everyone wants their horse to be there. That’s a hell - yeah! I just happened to go every step of the way with Crimson 'N Gold on my mission quest. Sort of like a vision quest but not as technically shamanic metaphysical, way more physical.

He is my riding horse and lives at home with me and other four-legged friends and the wild winged ones now. Acting in the capacity of chief consultant as I master the simplest, most profound service, technique, product to offer those involved with racing to achieve best strides with less wear and tear.

An Exercise Saddle from WOW, relieves the pressure on the back by making it even across the surface. Buy your racehorses Exercise Saddles from me and see the hours involved in training get easier. It’s a WOW, made by First Thought Equine in England.

I fit it only on a relaxed back to give you the best feedback possible. It’s a 3 step process and I won’t let you buy it unless its right for that shape back. If you are not completely satisfied with the best strides it produces I will find out why.

Identifying the horses with the same back shape and those with different shape is included in the fitting. There are manufacturer’s warranties; 5 years on the tree and 1 year for materials and workmanship in accordance with good care practices. Wear and tear from normal use is excluded.

Convey to a horse which has done well in a race that you have been to the test barn after a race with one and it recognizes that you know deeply, or at least have been there to witness, the full impact of what its body has gone through. Finding a no fuss no muss way to improve, add ease and comfort for this athlete is not success, it’s a major advancement. For reasons beyond the scattered bombardment to which the equine is subjected in racing, train instead in an exercise saddle from WOW to lessen the physical toll.

I have included a unique way of supporting the horse and trainer throughout the buying process. I make sure to fit the unique shape of the back at the base of the withers on a neutral, relaxed back. Applying a PEMFp (electromagnetic field pad) each 3 appointments for the best saddle solutions at: pre-order, delivery and a month or some weeks later. It’s a great saddle and costs the same either DIY or with my onsite fittings. Go ahead call it a bargain, I’m pleased to hear it.

To knock back, back issues, soreness and weakness by sizing the correct headplate on relaxed neutral backs for ordering is the 1st fitting for back relaxing. Again, upon saddle delivery, a relaxed back helps setup an attitude that a saddle is not something to tense over in the morning is the 2nd fitting. About a month later, or some weeks later, checking for headplate changes one more time on neutral backs helps attain the best stride sought consistently is the 3rd fitting included in the purchase.

Have a look at the even pressure across the backside from cantering for 8 seconds. You can feel it yourself, your horse’s confidence grows - aka class - and remember that “class beats speed”. True, its oft quoted in terms of breeding but there you go, it’s one of the intangibles that you can bring to bear on a physical aspect, pain or best stride, you decide.

To buy the Exercise Saddle from WOW here in the U.S., you need to give me a no-refundable $500 deposit. Beyond that, the balance of 2/3 is fully refundable as long as it’s returned in the same condition received. The total cost is $1499.00. Do give your racing equine their best stride by training in the WOW. I’m available for on site fittings at most track locations in the Mid-Atlantic; Maryland, Virginia and Pennsylvania area. If for any reason a future fitting or saddle check is desired beyond the three, then a fee is charged.
